

To our valued Patients,

Like so many of you, we have spent the last several days and weeks learning about the coronavirus (COVID-19) and how it is impacting our world, country and local communities. Our office is dedicated to understanding how it affects our patients, employees and doctors, and then making the necessary adjustments to our office routine.

We offer you the option of checking in from the parking lot via call or text and we will inform you when your treatment room is ready.

We take pride in our infection control, which follows the recommendations from the Center for Disease Control (CDC). Our employees and doctors use proper hand hygiene and are encouraged to stay home if they feel sick.

Please reschedule your appointment if you or a family member feels unwell or has a fever.

As of March 19, 2020, the governor of Colorado has shut down massage therapy services until May 1, 2020. Our doctors are still seeing patients and would be happy to take care of you.

We have one simple objective that guides us: keeping you, our patients, and our employees safe. We will continue to closely monitor the situation and do all we can to protect our patient family. Thank you for your continued trust in our office.

Dr. David Hansen, Dr. Sean Lynch, Dr. James Robin, and Dr. Lauren Pratt
